OBJECTIVE

Computer Science student with hands-on experience building AI-powered applications using Python, Google Gemini, and full-stack technologies. Passionate about Machine Learning, Deep Learning, and Generative AI, seeking an entry level role to build impactful real-world solutions.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++

Machine Learning: Supervised/Unsupervised Learning, Feature Engineering, Model Training, Model Evaluation, Classification, Regression, Clustering

AI & Deep Learning: Generative AI, Deep Learning, Natural Language Processing (NLP), Large Language Models (LLMs), Prompt Engineering, AI Application Development

Data Science: NumPy, Pandas, Scikit-learn, Matplotlib, Data Preprocessing, Exploratory Data Analysis (EDA)

AI Tools & Platforms: Google Gemini API, Google Vertex AI, TensorFlow, PyTorch

Frontend / Backend: React.js, Next.js, Tailwind CSS, Material UI, Redux Toolkit, Node.js, Express.js, REST APIs

Deployment & Cloud: Git, GitHub, Docker, AWS, REST APIs, MongoDB

EXPERIENCE

Web Developer Intern | Webocation

| April 2026 – June 2026 |

Worked as a Web Developer Intern at Webocation, developing responsive web applications using React and WordPress, integrating APIs, customizing themes/plugins, and collaborating with the team to deliver scalable, user-friendly solutions.

PROJECTS

Prepify AI : AI-Powered Interview Preparation Platform | MERN Stack, Google Gemini, Prompt Engineering

- Built and deployed an AI-powered interview platform using Gemini 2.5 Flash for resume-JD matching, skill-gap analysis, AI-generated interview questions, mock interviews, ATS optimization, personalized feedback, and performance analytics.

Network Anomaly Detection | Python, Pandas, NumPy, Scikit-learn, Random Forest, Machine Learning

- Developed a machine learning system for detecting and classifying anomalous network activity from network traffic data, using feature engineering, data preprocessing, and supervised learning to identify potential security threats and evaluate model performance.

Anomaly Detection on Enron Dataset | Python, Colab, Pandas, NumPy, Scikit-learn, Unsupervised Learning

- Developed an unsupervised AI system to detect abnormal email communication patterns using the Enron email dataset, leveraging NLP-based feature extraction and multiple anomaly detection algorithms including Isolation Forest, One-Class SVM, and Local Outlier Factor.

CERTIFICATIONS

- Build a Website on Google Cloud Skill Badge Issued by Google Cloud
- Prompt Design in Vertex AI Skill Badge Issued by Google Cloud

EDUCATION

- Bachelor of Science in Computer Science (BSCS)** | 7th Semester 2023 – Present |
University of Central Punjab, Lahore, Pakistan
- Intermediate (HSSC) – Higher Secondary School Certificate** | 2021 – 2023 |
Punjab Group of Colleges, Lahore

SOCIETIES & COMMUNITIES

Google Developer Groups on Campus (GDGoC UCP) General Member | 2024 – Present

AWS Student Builder Group (AWS UCP) General Member | 2026 – Present

INTERESTS & HOBBIES

- Following AI/ML Research Trends
- Reading Tech Blogs & Dev Documentation
- Football
- Cricket
- Chess
